Selly Putri Yani. 2023. *Production Activities of Andesite Natural Stone Factory and Its Influence on the Socio-Economic Conditions of the Community in Mekarrahjarja Village, Talaga District, Majalengka Regency*. Geography Education Study Program. Faculty of Teacher Training and Education, Siliwangi University.

*This research is based on the problems found in Mekarrahjarja Village, Talaga District, Majalengka Regency, namely production activities of using andesite natural stone and its influence on the socio-economic conditions of the community in Mekarrahjarja Village, Talaga District, Majalengka Regency. Natural andesite stone that is used by the community becomes finished goods that have economic value in a natural stone factory that uses technology and workforce skills to create jobs for the surrounding community. The method used in this research is a qualitative method. Data collection techniques include field observations, interviews and documentation studies. Data analysis uses the Miles and Huberman model, namely data collection, data reduction, data presentation, and drawing conclusions. The research results show that the production activities of natural stone factories depends on the raw materials obtained, the equipment used, the skills of workers in processing natural stone into finished goods, the products produced, and marketing. Meanwhile, the impact on socio-economic conditions is absorbing labor, increasing income, increasing the level of family education, and increasing ownership of living facilities.*

**Keywords:** *Andesite Natural Stone, Factory Production Activities, Socio-Economic Conditions.*
