Kata Kunci: *Home industry*, Tahu, Sosial Ekonomi

ABSTRACT

SALMA MAULIDIYA PUTRI, 2023. ***THE INFLUENCE OF HOME INDUSTRY ACTIVITIES ON THE SOCIO-ECONOMIC CONDITIONS OF THE COMMUNITY IN INDIHIANG DISTRICT, INDIHIANG DISTRICT, TASIKMALAYA CITY.*** Geography Education Department. Faculty of Teacher Training and Education. Siliwangi University. Tasikmalaya.

Home industry is a business opportunity that is starting to emerge in line with the current era of globalization due to the increasingly limited job opportunities available. The tofu home industry in Indihiang Village, Indihiang District, Tasikmlaya City has an influence on the number of unemployed due to the lack of job opportunities in Indihiang Village and it is seen that many people prefer to work outside the city rather than in their own area. This research aims to determine the activities of the tofu home industry in Indihiang Village, Indihiang District, Tasikmalaya City. Tofu home industry activities can be identified through the procurement of raw materials, manufacturing processes and marketing. Meanwhile, the influence of tofu home industry activities on the socio-economic conditions of society can be determined through income, livelihood, increased education of family members, and wealth ownership. The research method used is a quantitative method. The number of samples in this study was 43 respondents from owners and workers. The sampling technique used was simple random sampling. The data analysis techniques used are simple quantitative analysis techniques and 5W+1H analysis. The data collection techniques used were observation, interviews, documentation, questionnaires and literature studies. Based on the results of research in the field, tofu home industry activities can be identified through raw material procurement, manufacturing processes and marketing. Meanwhile, the influence of tofu home industry activities on the socio-economic conditions of the community can be determined through income, livelihoods. The conclusion of this research is that the procurement of materials includes main and additional raw materials, the process of making tofu consists of 6 stages, marketing of tofu is marketed around Tasikmlaya City . A worker's income in a month is a maximum of IDR 2,000,000 and a minimum of IDR 500,000, the community's livelihood is making the tofu home industry their main job, and the increase in education of family members seen from the education of the respondents' children, most of whom are required to study for 12 years and they think Education is very important. Ownership of wealth Most of the respondents own their own houses and own motor vehicles.

Keywords: Home industry, Tofu, Social Economy
