The development of the technological era, making Sharia Economics Students of Siliwangi University shop online at marketplaces, one of which is Shopee, this can be seen with the development of the internet as an increasingly sophisticated business opportunity to meet the needs of consumer life. Shopee is one of the most visited marketplaces in Southeast Asia which sells several types of products. To win the competition between e-commerce, Shopee carries out marketing communication activities that encourage instant purchases or what is called impulse buying. There are several factors that influence impulse buying including the influence of shopping lifestyle, discounts and religiosity. In the era of globalization, it has brought Indonesian people into a consumptive culture, where shopping has become their lifestyle. Therefore, the purpose of this study is to determine: (1) The influence of shopping lifestyle on impulse buying in Shopee e-commerce ; (2) The effect of discounts on impulse buying in Shopee e-commerce; (3) The effect of religiosity on impulse buying in Shopee e-commerce; (4) The influence of shopping lifestyle, discounts and religiosity on impulse buying in Shopee e-commerce.

This research uses descriptive quantitative methods with probability sampling techniques . Data was collected using a questionnaire. The population in this study were Siliwangi University Sharia Economics Students, the sample was 149 respondents.

The results showed that: 1) Shopping lifestyle factor (x_1) has a positive effect on impulse buying (Y) with a regression coefficient value of 0.412; 2) Discount factor (x_2) affects impulse buying (Y) with a regression value of 0.480; 3) Religiosity factor (x_3) affects impulse buying (Y) with a regression coefficient value of -0.204; 4) The results showed that the variables (x_1) shopping lifestyle, (x_2) discounts and religiosity (x_3) together had an effect on impulse buying (Y) by obtaining a coefficient of determination R^2 of 0.282 or 28.2% and the remaining 71.8% was influenced by other variables not included in this research model.

This research provides a deeper understanding of the factors that influence impulse buying among Siliwangi University sharia economics students when shopping online on the Shopee e-commerce platform. The implications of this research can be used as a basis for developing more effective marketing strategies and increasing consumer awareness. This research is expected to provide a better understanding of impulse buying behavior in the digital era, especially among Islamic economics students at Siliwangi University.
