This study aims to determine and analyze (1) bonus plans, debt covenants, political costs and accounting conservatism in Technology Sector Companies Listed on the NIKKEI 225 Japan Exchange Group Index and the Indonesia Stock Exchange Period 2015-2018. (2) The effect of a partial and simultaneous bonus plan, debt covenant and political cost on accounting conservatism in technology sector companies listed on the NIKKEI 225 Japan Exchange Group index and the Indonesia Stock Exchange. The research method used by the author is a descriptive, quantitative analysis method with a survey approach. The data analysis technique used is panel data regression analysis with Eviews 10. The results of the data analysis show that: (1) bonus plans, debt covenants, political costs and accounting conservatism have fluctuating values. (2) Partially, the bonus plan has a negative effect on accounting conservatism, debt covenant has a positive effect on accounting conservatism and political cost has a negative effect on accounting conservatism. While simultaneous bonus plans, debt covenants and political costs affect accounting conservatism. The results of the coefficient of determination (R²) show that the effect of the bonus plan, debt covenant and political cost in explaining accounting conservatism is 69.31%.

Keyword: Bonus Plan, Debt Covenant, Political Cost, Accounting Conservatism

ABSTRAK
