The purpose of this thesis is to find out the procedures for implementing Taska (Time Insurance Savings) in terms of the terms of account opening, deposit, withdrawal, interest calculation, benefits provided and insurance involved in Taska (Time Insurance Savings). Data collection methods used were direct interviews with relationship officers to obtain information about the procedures for implementing Taska, observations made to be directly involved in the activity of the bank, and literature studies that collected data from various book sources. The procedure for implementing Taska starts with providing the necessary requirements, determining the nominal amount to be deposited every month, choosing the time period as desired, determining the due date, calculating the interest to be obtained and explaining the procedures for disbursing Taska if it has entered the time of funds withdrawal. pre-set. So the procedure for implementing Taska can be carried out smoothly if the customer meets the terms and conditions that apply in the company, then everything will go according to the plan that was set at the beginning.
