*The problem in the research is related to the low interest in entrepreneurship among students of the Department of Economics Education, Faculty of Teacher Training and Education, Siliwangi University. This study aims to determine the effect of entrepreneurship education and family environment on interest in entrepreneurship. The use of methods with a quantitative approach is supported by an explanatory survey design using research questionnaires as a data collection tool. There is a positive and significant influence between entrepreneurship education on the entrepreneurial interest of students of economic education class 2018 Faculty of Teacher Training and Education, Siliwangi University, Tasikmalaya. This is evidenced by the results of hypothesis testing obtained where  $t$  count is greater than  $t$  table, namely  $3.584 > 1.98$ , then  $H_0$  is rejected and  $H_a$  is accepted, meaning that the higher the entrepreneurial education of students, the higher the entrepreneurial interest of students. There is a positive and significant influence of the family environment on the interest in entrepreneurship. This is evidenced by the results of hypothesis testing obtained where  $t$  count is greater than  $t$  table where  $4.582 > 1.98$  then  $H_0$  is rejected and  $H_a$  is accepted, meaning that the better and supporting the family environment for entrepreneurship, the higher the entrepreneurial interest of students. There is a positive and significant effect of entrepreneurship education and family environment on interest in entrepreneurship. This is evidenced by the results of hypothesis testing obtained where  $F$  count is greater than  $F$  table of  $25.684 > 2.65$ , meaning that the higher the level of entrepreneurship education and the better the student family environment, the higher the student's entrepreneurial interest.*
