*This final project aims to describe and find out one of the tasks and functions of the PT Jasa Raharja Office and Tasikmalaya City Representative Insurance. Because with the development of technology, so that it is increasingly dense and can cause many accidents, motor users should get the protection one of them through insurance established by the Government, this insurance provides protection to the public from loss. With the descriptive method of writing, this final project focuses on the procedure for insurance claim disbursement. In this study that the public still did not know about the procedures for disbursement, because it could slow down the disbursement process. The company should provide more information to the public about the procedure for disbursing Insurance Fund claims for road traffic accidents.*
