*The purpose of this research is to determine: (1) the partial effect of the unemployment rate, poverty level, and human development index on economic growth in West Java Province in 2009-2019, and (2) effect of unemployment rate, poverty level, and human development index together on economic growth in West Java Province in 2009-2019. The research method used is Ordinary Least Square (OLS) with multiple linear regression analysis model with hypothesis testing using t test and F test. The results of this study indicate that: (1) partially the unemployment rate has a positive relationship and has a significant effect on economic growth, the poverty rate has a negative relationship and has a significant effect on economic growth, and the human development index has a significant negative relationship with economic growth in West Java Province, and (2) together, the unemployment rate, poverty rate, and human development index have a significant effect on economic growth in West Java Province.*

***Keywords:*** Unemployment Rate, Poverty Level, Human Development Index, and Economic Growth.
