*THE EFFECT OF COMBINATION PASSING EXERCISE USING THE
TOURNAMENT TEAM GAMES METHOD ON PASSING SKILLS FOR GAMES
VOLLEYBALL (Experiments on Volleyball Extracurricular Students Participants
SMPN 10 Kota Tasikmalaya)*

The purpose of this study was to determine the effect of the combination of exercises using the Team Games Tournament (TGT) Method on Passing Skills for Volleyball Games for Students participating in the Volleyball Extracurricular at Tasikmalaya 10 Public High School in City of Tasikmalaya. This research method uses the experimental method. The training process activities were carried out for 18 meetings. The population of the study were experimental students in 45 volleyball extracurricular members of Tasikmalaya City Junior High School 10 in Tasikmalaya. A sample of 20 people was taken randomly. The research instrument used the test of the passing skills of the volleyball game performed on the initial test and the final test. The results showed that the exercise using various forms of variations in training significantly affected the passing skills of the volleyball game in the experimental students of the volleyball extracurricular members of Tasikmalaya 10 Junior High School. To improve service skills for volleyball games junior high school students (SMP / MTs) are advised to use combination passing with the team games tournament method.
