This research aims to analyze the influence of labor, inflation, and interest rates on domestic investment in West Java Province. By analyzing (a) How labor, inflation, and interest rates partially affect Domestic Investment in West Java Province in 2006-2020 and (b) How labor, inflation, and interest rates jointly affect Domestic Investment in West Java Province in 2006-2020. The analysis method used is multiple linear regression analysis using EViews 10 software. Testing using t-statistical tests and F-statistics tests. The results of this study showed that labor variables had a significant positive effect on domestic investment. Inflation variables have no significant negative effect on domestic investment. While the variable interest rate has a positive effect is not significant on domestic investment.

Keywords: Domestic Investment, Labor, Inflation, and Interest Rate.
