ABSTRACT

HANDRY ADHA PERMANA, 2022. *Achievement Motivation of Football Athletes Without Spectators During a Pandemic In The 3 Series 2 League Competition.* Department of Physical Education. Faculty of Teacher Training and Education. Siliwangi University. Tasikmalaya City.

The COVID-19 pandemic has caused changes to new rules in the world of football, one of which is the ban on spectators during matches. In the absence of an audience, it can affect the extrinsic motivation of athletes. When extrinsic motivation decreases, it will affect intrinsic motivation, it is feared that the achievement motivation of Persindra Indramayu soccer athletes will decrease, which causes reduced enthusiasm when competing. The purpose of this study is to examine how motivation is and to find out what factors influence the achievement motivation of athletes without spectators during the pandemic in the League 3 series 2 competition. The research method used is descriptive qualitative method, where this research uses data collection techniques, namely interviews. In this study, the achievement motivation of athletes is the object of research and the subject of research is the athlete or player of the Indramayu Persindra. Data reduction techniques, data presentation and conclusion drawing. The results of the study showed that the achievement motivation of soccer athletes without spectators during the pandemic period in the 3 Series 2 League Competition remained high, which was known to be due to internal factors. This research is expected to be used as a reference for coaches and athletes when undergoing competitions without spectators.
