There are several theories used in this research. The theories are the mandate theory, the theory of political participation, and the theory of gender & politics. This research uses qualitative research methods, with a case study approach. This method provides a detailed description or detail about something. This study will provide a detailed description of the representation of women in the BPD in Tanjungsari Village, Sadananya District, Ciamis Regency for the 2019-2025 period.

BPD members in Tanjungsari Village numbered nine people, namely eight men and one woman. With the presence of female BPD members, it is hoped that all the aspirations of the women's community can be conveyed, then managed and realized properly. But in reality many obstacles were experienced, so that one female BPD member in the BPD membership in Tanjungsari village for the 2019-2025 period has not been able to realize all the aspirations of the women's community in Tanjungsari village.

Keywords : women's representation, political participation, gender & politics, BPD.
