ABSTRACT

The purpose of this study is to find out about the work environment and promotion that jointly affect the performance of permanent employees non-manager Bank BJB Kuningan Branch Office. Data collection techniques in this study were questionnaires, document studies and interviews (Interview). Then, the data analysis technique used is the validity test, reliability test, classic assumption test, multiple linear regression test, F test and t test. The results of this study prove that the variables of work environment and promotion partially have a significant effect on the performance of permanent employees non-manager Bank BJB Kuningan Branch Office. The results of multiple linear regression show that the work environment and promotion show a unidirectional relationship. Based on the results of the F test, it can be proven that the work environment and promotion have a positive and significant effect on the performance of permanent employees non-manager Bank BJB Kuningan Branch Office.
